FIG. 3A

The diagram illustrates a multi-stage process for applying a material layer. In the first stage, a substrate 12 is shown with a top surface 13 and side surfaces 13a. A nozzle 16 is positioned above the substrate at a distance D, dispensing material 11. The second stage shows the material 11 being applied to the substrate. The third stage shows the final assembly with material 11 covering the substrate 12. A cross-section S1 is indicated, showing the material 11 and the substrate 12. Other labels include 20, 21, 21a, and 70.
